

FMB-Süd 2022

Augsburg Exhibitor Centre

PRESS BRIEFING

FMB-Süd 2022

Bad Salzuflen, 28.04.2021

[FMB-Süd - the supplier show for mechanical engineering 2022 back in Augsburg](#)

Augsburg Exhibition Centre, 16th and 17th February 2022

After the break this year due to Coronavirus, FMB-Süd will be presenting its successful trade show concept once again at Augsburg Exhibition Centre on 16th and 17th February 2022. This specialised fair presents solutions in the field of mechanical and design engineering for the catchment area catering to regional trade visitors.

The exhibitors of the FMB-Süd will showcase the entire value-added chain of mechanical engineering according to the motto "Mechanical engineering – here's how!" – ranging from semi-finished products to machine parts and assembly groups to automation right through to customised industrial services. Design engineers, developers and decision-makers from the field of mechanical and plant engineering and their application industries will find partners at FMB-Süd with ideas to solve their problems, who offer tried-and-tested products, field-tested applications and innovative concepts.

The focus of the trade show lies on personal contacts and discussions. As a meeting point for the sector, the FMB-Süd brings together the key players of the region in targeted fashion. Christian Enßle, Head of Cluster FMB at Easyfairs GmbH: "In these post-corona times, it is particularly important to quickly enable technical suppliers to engage in constructive discussions with their customers again. The development of regional supply chains is gaining in importance. The FMB-Süd provides the region on the "technological hub of the south" with a professional platform for such development."

PRESS INFORMATION

Taking part in the show is made particularly easy for the exhibitors. The organiser Easyfairs GmbH offers a “care-free package” in Augsburg to enable companies to organise their participation swiftly and easily. All of the exhibitors present their products and services with an identical stand construction and are able to focus on the essence of the event: to address the questions of the visitors and offer them customised solutions.

The business environment in and around Augsburg offers the ideal conditions for this: a dynamic industrial region, distinguished by global players such as KUKA, MAN, manroland or MT Aerospace and innovative SMEs. Augsburg is conveniently situated in Germany’s strongest economic region between Stuttgart and Munich and also in the direct catchment area to Ulm, Aalen, Ingolstadt and Memmingen. The Schwaben region is characterised by a disproportionately high number of companies operating in the manufacturing industry. This means: The FMB-Süd is coming at the right time and taking place in the right location.
